

Continual Improvement Path

Assessment → Solution Design → Implementation → Process Control → Continual Improvement

Working Together with:

Driving Results™

CMTC Comes with Something Extra

CMTC delivers 3 – Dimensional Value™:

Certified Experts

- We understand the business pressures you face in today's rapidly changing world.
- Our Automotive expertise is rooted in decades of hands-on management experience.
- Our Automotive Consultants average 20 years of direct industry experience and generate superior impact verified by a third party.

Full Service Approach

- Our full line of enterprise-wide services will help you attain management, administrative, operations and supply chain improvements to bolster your bottom line.
- We use tailored solutions, coupled with the consistent application of our unique tools and approaches.

Committed Partnerships

- CMTC works closely with your team to define your key improvement areas to achieve your business goals.
- We are part of your team as solutions are implemented.
- We take the time to build a relationship that continues to grow beyond one engagement toward your achievement, continuous improvement and “World Class” performance.

National Network in Every State for Consistent Local Service Delivery

MEP takes a strategic approach to improving industries across the United States by providing consistent professional services, using national certified standards of performance and delivery.

a NIST | Network
MEP | Affiliate

CMTC is a private, mission-oriented non-profit corporation, affiliated with the National Institute of Standards and Technology's (NIST) Hollings Manufacturing Extension Partnership (MEP). Our affiliation assures performance standards that translate into customer services with consistently high benefits and satisfaction. Quarterly NIST surveys ensure full accountability and a performance scorecard of certified value for our customers. Our agreement with NIST covers non-project costs so that all client fees cover only those services provided.

CMTC provides consulting services in the practices of Strategic Business, Lean Enterprise, Information Technology, Energy Savings, Quality Management, Supply Chain Management, and Small Manufacturers services and specialized training through a partnership with Cerritos College.

For more information about our Automotive Services or any other Service, contact us at: 800-300-CMTC or 310-263-3060 (California only). Also, visit our website at www.cmtc.com

California Manufacturing Technology Consulting™

Automotive Consulting Group

The automotive industry is confronted with unprecedented challenges; accelerated global competition, diversified customer needs and rapid evolution of technologies. National and regional market boundaries no longer exist. As a result, it is hard to make any precise forecast of the market needs to stay ahead of the competition.

Automotive industry executives

face profound challenges of a changing market, characterized by increasing complexity and less room for error and inefficiency.

Automotive industry executives face profound challenges of a changing market, characterized by increasing complexity and less room for error and inefficiency.

- The ongoing globalization of the industry and the imperative to establish operations in high-growth, low-cost regions for sourcing.
- The need to develop future markets
- The drive to establish more flexible production and cost structures
- The ongoing need to innovate, even as financial resources become more limited
- The skills and experience required within the organization as a result of current industry trends
- The state of talent development and succession planning in the industry

With strong thought-leadership in the Automotive Industry, California Manufacturing Technology Consulting (CMTC) and the CMTC Automotive Team, a specialized automotive consulting group, dedicated to working with Automotive and Specialty Equipment manufacturers, is positioned to take your organization to the next level.

CMTC's Automotive Consulting Group

For the last 20 years, CMTC Consultants have been working with Automotive associations along with Automotive and Specialty Equipment manufacturers to define and implement the process for improving competitiveness.
